NURSECOAST-II

Model Nutrients Reduction Solutions in Near-Coast
Touristic Areas

The NURSECOAST-II project guides public authorities, water companies, and tourism businesses in mitigating the seasonal increase in wastewater production and nutrient discharges in tourist areas around the Baltic Sea.

This #MadeWithInterreg project helps drive the transition to a green and resilient Baltic Sea region.

Organisations from the following countries cooperate together to make that happen:

Denmark, Estonia, Finland, Germany, Latvia, Lithuania, Poland, and Sweden
